

**Petrodex® Tooth-Hugger Brush**

The Tooth-Hugger has unique bumps, nubs, and ridges that gently cleans all exposed surfaces of pet's teeth. The inner rounded nubs gently scrub the top, front and back surfaces of the tooth, while the outer edge massages the gums and loosens material caught at the gum line. The outer ridges and nubs clean the tongue and cheeks of pets. The firm yet flexible brush head adjusts to create the best angle for cleaning.

**Petrodex® Tooth-Hugger Dosing Brush**

Petrodex Dental Gel is preloaded in the Hugger Dosing Brush. The dosing cartridge doubles as the handle. Easy to use, just point the brush head down and twist the bottom end of the cartridge to release gel. Unique brush shape helps the maximum amount of gel to come in contact with pet's teeth.
